

Section 8

**School Food
Authority Fund
Operating
Procedures**

Section 8: School Food Authority Fund - Operating Procedures

Title 1, General Rules and Regulations

Application

All procedures in this Manual apply to the operation of the school food authority fund except where this section may conflict with other procedures in the Manual.

Petty Cash and Change Accounts

A predetermined amount of cash may be set aside as a “change account” for the purpose of making change in the cash collecting operation only. A petty cash account is not allowed in the school food authority fund. The change account shall be reconciled each day. Only the exact predetermined amount of change shall be withheld from each day’s deposit. (**NOTE:** The change account cannot be used to balance overages and shortages in collections.)

Utilization of School Food Authority Fund Money

Income accruing to the school food authority fund in any school, including interest earned on school food authority accounts, shall be used only for school food authority fund purposes. Such income shall **not** be used to purchase land, to acquire or construct buildings.

Vending Machines – Fund Raising

Vending machines operated by the School Nutrition Program and fund raising for the benefit of the School Nutrition Program will follow rules established by federal, state, and local rules and regulations.

Banquets and Special Functions

A formal contract document should be developed for use by the director of schools and/or board of education in authorizing banquets and special functions. School food authority fund money and commodities from the U.S. Department of Agriculture (USDA) must not be used to subsidize these activities. The contract must include the amount to be paid by the requesting organization to cover all costs of the function. The itemized costs on the contract should include food, nonfood supplies, food inventory used, nonfood supplies inventory used, labor, fringe benefits, utilities and any other itemized expenses incurred. Regulations require that a school system have documentation that the funds received by the school food authority for the banquets and special function cover all costs.

The school food authority must have complete documentation. The cost of nonfood supplies and foods in inventory (other than USDA commodities) could be determined with an issue record. These issue records, along with invoices, time sheets, allocation summaries for utilities, and documentation for other costs should be filed with each record of payment and contract. Other charges for facilities, use of facilities and equipment, damage deposit, etc. may or may not be included. If the cost for the special function includes a profit, the local board should decide its disposition. The school food authority fund must be reimbursed for all costs.

When the school food authority is centralized, the scheduling and all accountability procedures required for banquets and special functions are the responsibility of the centralized school food authority staff.

In a non-centralized school food authority, all accountability procedures required for banquets and special functions are the responsibility of the cafeteria manager and the principal. Payments for services to cafeteria employees who cater such affairs must be channeled through the individual's payroll records and are subject to all necessary withholdings. Authorization of the function by the director of schools and/or the board of education constitutes authorization for such payments.

Centralization

A fully centralized school food authority is one in which the central office staff has day-to-day control over the following areas:

- a) Fiscal Management
- b) Procurement of Goods and Services
- c) Personnel
- d) Menu Planning

Separate Accounting Required

Separate accounting records must be maintained for all school food authority funds and should include the same accounting records as described in the accounting and reporting section. Many of the activities of a cafeteria are similar to or would require similar documentation as addressed in previous sections of this Manual. These include ticket sales, cash register use, overall controls, teacher/other collections, collection logs, expenditures, etc.

Indirect Cost

Indirect costs may be included for each program in a Claim for Reimbursement only through the application of an indirect cost rate. The school food authority's indirect cost rate is established by the Tennessee Department of Education. Local education agencies can recover indirect costs only from the reserve fund that exceeds three (3) months operating expenses.

Charges

If charges are allowed, the local education agency must have a board approved charge policy. Uncollected charges must be recouped from other than school Nutrition Program funds.

State Matching Funds

State Matching Funds must be used solely in the School Nutrition Program. Ten percent of the State Matching Funds shall be applied to the costs of one or more of the following:

1. employment of a certified school food service supervisor.
2. employment of cafeteria managers or assistant managers accredited by the Tennessee School Food Service Association or working toward such accreditation.
3. Professional training programs for non-accredited personnel.

Retention of Records

School Nutrition Records must be retained for a period of three years after submission of the final claim for reimbursement for the fiscal year. If audit findings have not been resolved, the records shall be retained beyond the 3-year period as long as required for the resolution of the issues raised by the audit.

Financial Statements and Schedules

The school food authority financial statements are prepared in accordance with the reporting standards established by the Governmental Accounting Standards Board. See section 7-6, "Illustrative Financial statements and Schedules", which addresses certain basic reporting requirements that also apply to the School Food Authority Funds.

**Notes to the Financial Statements
Typical School System
for the Year Ended June 30, 20x2**

Note A - Summary of Significant Accounting Policies

1. Financial Reporting Entity

This report includes only the non-centralized school food authority funds of Typical School System.

2. Basis of Accounting

The accounting and financial reporting requirements for school food authority funds are illustrated in the *Tennessee Internal School Uniform Accounting Policy Manual*, issued by the Tennessee Department of Education. The school food authority financial statements are prepared in accordance with the reporting standards established by the Governmental Accounting Standards Board.

3. Measurement Focus/Basis of Accounting

Measurement focus refers to what is being measured; basis of accounting refers to when revenues and expenditures are recognized in the accounts and reported in the financial statements. Basis of accounting relates to the timing of the measurement made, regardless of the measurement focus applied. The school food authority funds use a financial resources measurement focus and are accounted for using the modified accrual basis of accounting. Revenues are recognized when susceptible to accrual, i.e., when they become measurable and available. Management policies define available as collectible within 30 days, 60 days, or other time frame, after the fiscal year end. Expenditures are generally recognized under the modified accrual basis of accounting when the related fund liability is incurred, if measurable.

4. Fund Structure

The school food authority fund of the individual schools is considered to be a separate accounting entity. The operations of each fund are accounted for by providing a separate set of accounts, which are comprised of the fund's assets, liabilities, fund equity, revenues and expenditures.

5. Inventory

Inventories are stated at lower of cost (first-in, first-out) or market (net realizable value). Inventory items are recognized as expenditures when purchased (purchase method). Fund balances have been reserved for the amount of inventories on hand at year-end. Donated inventory from USDA (commodities) is

not recorded in the school food authority fund in accordance with generally accepted accounting principles.

Note B - Collateralization of Deposits

Cash in bank represents funds on deposit in various depositories. These balances were entirely insured by the FDIC or through the Bank Collateral Pool with the State of Tennessee.

Note C - Commitments

1. Long-Term Non-cancelable Leases

Typical School System Food Authority Funds has entered into certain non-cancelable leases, which have been approved by the local legislative body. These leases are reported as a part of the primary government's general long-term debt. However, the various school food authority funds are obligated to make the monthly payments on these leases.

City Elementary School Food Authority Fund entered into a lease agreement with Apex Corporation for the purchase of an ice cream machine. Monthly lease payments are \$400. The balance of the lease at June 30, 20X2, was \$2,360.

Minimum lease payments:

20X3	\$2,360
------	---------

Central High School Food Authority Fund entered into a lease agreement with Apex Corporation for the purchase of a freezer bin. Monthly lease payments are \$400. The balance of the lease at June 30, 20X2, was \$3,200.

Minimum lease payments:

20X3	\$3,200
------	---------

Note D – Fixed Assets

Fixed assets acquired by the individual school food authority funds are recorded as expenditures at the time of purchase. Title and accountability for fixed assets purchased pass automatically to the board of education.

Note E - Retirement Plan

Certain school food authority funds' employees have elected to participate in the Tennessee Consolidated Retirement System (TCRS) via a plan administered through ABC County, Tennessee. Information related to this plan can be found in the audit report of ABC County, Tennessee.

Note F - Prior Period Adjustment

Central High School Food Authority fund's beginning fund balance was adjusted by \$536 in order to properly reflect fund balance at July 1, 20X1. Prior year accounts payable were overstated resulting in expenses being overstated and fund balance being understated.
